Chapter 5: Fractions

a = numerator
b = denominator

	$\frac{1}{2} = \frac{\text{no. of object}}{\text{no. of portions}}$

Types of Fractions

1. **Proper Fraction** – Numerator is smaller than denominator.
   For ex: 5/8
2. **Improper Fraction** – Denominator < Numerator.
   For ex: 11/9
3. **Like Fraction** – When denominators are equal.
   Ex: 6/9, 2/9, 4/9
4. **Unit Fraction** – When the numerator is 1.
   For ex: 1/8, 1/6, 1/12, 1/3
5. **Mixed Fraction** – 2 1/6, 4 2/3

Homework

1. **Proper Fraction**
   4/8 , 2/8 , 7/13 , 10/15
2. **Improper Fraction** –
   5/4 , 7/5 , 9/6 , 7/3
3. **Mixed Fraction** –
   $2\frac{1}{6}$, $4\frac{2}{3}$, $7\frac{2}{8}$, $13\frac{11}{5}$, $2\frac{2}{2}$
4. **Like Fraction** –
   5/8 , 6/8 , 8/8 , 7/8
5. **Unit Fraction** –
   1/2 , 1/8 , 1/7 , 1/10 , 1/5
